

## THE MORNING APPEAL.

The Official Paper of Ormsby County  
FRIDAY..... MAY 3

### THE PAROLE SYSTEM.

It is Advocated by an Inmate of  
the Prison.

The APPEAL has received from E. S. Kendrick now confined in the State Prison a very well written pamphlet entitled "The Meditations of a Prisoner." In this he advocates the Parole System. He uses among other arguments the following:

I would give a prisoner who would show by his conduct a spirit of reform a parole after half of his time, with conditions attached, as is done in the Minnesota state prison, so that, should he fall back into his old way of living, he would be returned to prison to serve out the remainder of his sentence. By this means you to all intents and purposes hold a power over him, and he will be very careful as to what he is about. This habit in time will grow upon him, and be the cause of making him a good citizen and trustworthy member of society. To men serving life sentence I would, on the recommendation of the prison warden, give a parole after manslaughter sentence has been served. This is a class of men that deserve some looking after by the kindly interest of humane persons. Give them hope and encouragement. Do not leave them to their own morbid thoughts; you cannot tell what drove them to an act they will regret, whether in or out of prison.

In connection with the parole law we should have our prisoners guarded as first, second and third class, giving to the second grade or class advantages above the third, and to first above the second, giving them a motive to reform their ways while yet in prison, and their partial liberty from the first class by parole. By this means you instill into the prisoner a habit for good which in time will take root and prove a blessing, not only to the prisoner, but also a source of pleasure to those bringing it about.

He also advocates allowing married men to work out on parole, their earnings to go to their families.

### The Gallant Hawthorne.

Justice Hawthorne is always gallant to the ladies. Yesterday a good looking young woman was about to testify in his Court when he said, "Madam what is your age?" "Twenty-nine Judge." "Now you may be sworn."

## STEWART ON CLEVELAND.

The Silver Senator Sarcastically  
Roasts the Administration.

Washington, D. C., May 1.—Senator Stewart of Nevada has written President Cleveland another "roasting" letter, in which he says:

"I renew my congratulations for your conspicuous bravery in promoting the policy of the mother country. The joint success of yourself and Lord Kimberly in planting the British flag and extending British rule over Nicaragua is admired and applauded by every loyal subject of the Queen, and will secure for you the love and respect of all true Englishmen. Your great and magnanimous nature will not be disturbed by unreasonable complaints of any of your own countrymen who continue to cling to the narrow and unreasonable prejudices which the defendants of the rebels of 1876 still entertain against that great and good government which is still willing to protect us, notwithstanding the ill will and ingratitude of our deluded ancestors.

"Your exalted position enables you to see the great advantage of the cordon of British naval stations guarding our exposed seaports on two oceans, and the great security and commercial advantages the Nicaragua canal will afford under British jurisdiction. Your clear vision spans the continent and extends to far off islands of the Pacific, and you fully comprehend the complete protection that the navy of Great Britain, with headquarters at Honolulu would be to the Pacific Coast.

The people of the United States will view with much satisfaction the preparations which you and Lord Kimberly are making to present the claims of British and American subjects who, in the interest of the mother country, conspired to overthrow the Republican Government of Hawaii. The fact that the conspirators were unsuccessful aggravates the crime of the republic in maintaining its constitutional Government, and furnishes you and Lord Kimberly ample justification for demanding impossible reparation, to make an excuse for planting the British flag and extending British rule over the only remaining outpost in the Pacific where military establishment by an unfriendly power would menace the commerce of the United States.

"When you have fully secured the protection of England for our extended seacoast on both oceans and the construction of the Nicaragua canal at the expense of the United States for the benefit of Great Britain your economy will be appreciated. When the trouble and expense by the unjustifiable wars and contentions of your predecessors against our mother country are compared with your wise and conciliatory policy the ingratitude of the American people will shock the sensibilities of all loyal subjects of the British crown, and they will fully appreciate the wisdom and patriotism of your administration.

## FRAUDULENT MINING DEEDS.

Mining Expert Grossman Gets  
Into Trouble.

Yesterday afternoon mining expert Grossman was arrested in Reno on complaint of A. Livingston to whom he had given deeds to mining property in Pine Nut, which he did not own. After the giving of the deeds he hired a horse and buckboard of Doc Benton and went to Reno. He was arrested under telegraphic instructions from this city. Doc Benton went after him.

Grossman has been quite a prominent character about Pine Nut and developed the Schulz-Zirn property. He has always represented himself as being able to control large sums of money, etc. Gen. Marlett and Homer Wilson are spoken of as having been bitten by him.

### A Lock for Bicycles.

An ingenious device is for locking the steering gear of bicycles. By a turn of the key, it is stated, the front wheel of the machine can be locked in any position. If the bicycle is left standing at the side of a pavement with the steering gear locked and a thief jumps on to ride off with it, he will soon find himself in difficulties. The locking apparatus is very small. It adds very few ounces to the weight of the machine, and unless one looks for it specially it would quite escape notice. The construction is said to be simple and cannot get out of order, and can be made and applied at a small cost.

During the past two years people have mortgaged their homes to enable them to purchase bicycles. The same craze has begun here, and wheels are as thick as flies. The neat bloomer bicycle costume worn by the ladies is the only thing now left to make wheeling a joy and beauty forever.

## THE CATTLE ADVANCE.

Reasons for the Recent Stiff  
Prices.

From all sections of the country comes the same story of advancing prices for cattle. The best Eastern authorities on the beef market are unanimous in the belief that there will be a shortage for several years to come in beef cattle, and prices must advance. As bearing on this advance of prices, Clay Robinson & Co., the well-known commission merchants who publish the Live Stock Report, have published a comprehensive census of the present feeding situation. A shortage of 40 per cent compared with last year is estimated in the supply of cattle to come forward by July 15th. This is the conservative conclusion from an inquiry which has been pushed into all the chief feeding districts.

On the same point the Chicago Drovers Journal says: The high price for cows for the past sixty days has resulted in active shipments until the supply in the country is pretty well exhausted. It is said by some who have made a pretty careful canvass that there has not been such a scarcity of stock in years. The result of this depletion will be seen in the next two or three years, and some believe that the scarcity of good beef cattle will be more keenly felt than it is now. Dressed-beef men do not regard the outlook as very favorable to their interests, but under such circumstances the chances are that the consumptive demand will be sufficient to keep the price of dressed meat products in ratio equal to the advance in live cattle.

In sympathy with the rise in prices in the East has come an advance in the local markets throughout Montana. The advance is not confined to beef cattle, but the price for live stock have been moving up the scale for some time, and producers have been having little to grumble at. The tendency is still upward, and it has been a good many years since the general outlook for all kinds of stock has been so good.

Now if Montana stockgrowers can have good Spring rains, next winter all the cattlemen can go to California and some of the sheepmen can quit postponing meals.—Montana Stockman and Farmer.

The Texas Farm and Ranch says: Beef cattle have advanced about 25 per cent in the past sixty days, and ranchmen are happy.
